ROW BREWING IN CENTURY CO.

The Minority Shareholders Are Kicking Over Assessment.

WEEK'S ORE AND BULLION

ANOTHER CROWD SENDS MEN INTO NEVADA.

Minority interests in the Century company are up in arms over the assessment levied during the week and a number of the smaller stockholders declare that the management will have to show them that the present call of \$6,000, and those which are promised, are necessary before they pay a cent, even if they have to call on the courts to see them through. In the ranks of some of them the belief exists that a few insiders have settled upon the assessment plan to freeze them out.

"We have not got quite in shape to make a move yet," said one of a bunch of the shareholders yesterday, "but we propose to have a 'showdown' very soon. We believe that the mine is capable of turning good money. If it has not been doing so, as stated by the secretary of the company, we believe we are entitled to know why. A report on general conditions will not satisfy our curiosity either. We shall demand to know from the books what the mine has produced during the past six months and what has become of the money. A few months ago the stock was considered worth 70c a share and we know that over twice that figure was offered for the control and quickly turned down. Today the best bid for the stock was \$1.40, which places a value of \$12,400 on the property. The mill would sell for more than that if offered to a junk dealer. I believe none of the minority stockholders want to do anything that is not fair, but from the talks I have had with some of them, I am certain they will stand together for a square deal all around."

MINING STOCK EXCHANGE.

Week Closes on Fair Trading and a Strong Undertone to Market.

The week on the mining exchange closed with the market holding a strong undertone. For a day or two business was very slack and it looked as though a holiday lull was on in earnest. Dull sessions were invariably followed by livelier ones, however, and the impression prevails in brokerage circles that business will be good all through the month. During the six days a total of 35,843 shares of stock, with a selling value of \$2,400, changed hands yesterday, a slight increase from 30,000 shares and \$1,944.31 on the total.

Daily has been an active and attractive trader during the week, starting at \$2.40 and closing on sales at \$2.55. Daily-Judge, which held at \$1.80 during the previous week, sold first at \$1.95 and closed with the transfer of fifty shares at \$2.00 cash, and fifty at \$2.15 seller term. Daily-West has fallen off 25c to \$1.75.

May Day has been strong all week. It opened at \$2.25 and closed at 25c. New York sold on Monday at 20c and has since been sold up to 25c, the close finding it at 25c bid, 25c asked.

Sacramento, in anticipation of a dividend, has been a little more active and stronger, while Butte, Little Chief, Star Consolidated, Silver Shield, Ajax and Yankee have held their own very nicely.

Petro is much stronger, as is also Uncle Sam, which, while not announced, has been holding at close to 25c.

Following is the list of final quotations and record of sales made yesterday:

COMPANY MUST PAY.

Judgment Against Century Affirmed by Supreme Court.

Justice Baslin of the supreme court yesterday handed down an opinion upholding the decision of the district court which awarded Dr. John T. White a judgment of \$2,410.13 against the Century Gold Mining & Milling company. The company had borrowed the money of White between Oct. 1, 1931, and July 21, 1932, agreeing to pay it back out of its first profits. In October, 1932, White demanded the return of the money, but his request was not complied with, although during September and October of 1933 two dividends of \$1,500 each were paid the stockholders of the company. Oct. 29, 1933, another \$1,500 dividend was declared. Between April and October of 1933 the profits were greater than White's claim. No profits were made previous to April of 1933, and when the case came up in the lower court the company pleaded the statute of limitations, as the money had been borrowed five years before.

The attorney for the debtor argued that by the provisions of the law the action was barred. The court allowed that a reasonable time had elapsed before the payment of the first dividend, but in September of 1933, in which reasonable time a suit should have been brought. But the court held the statute of limitations could not begin to run until a reasonable time after the creation of the obligation had elapsed.

"The burden of proving that the action was barred was upon the defendant, and therefore, as it neither
